SCATTERED STARS

Ideas -

a scattering of stars in the universe

Sometimes organized like the Big Dipper and the Little Dipper

With thoughts somewhere in between

Christine Renhard Stenstrom's work as a painter and writer vividly reminds us that just as painting can speak, writing can picture, help us to see, to enjoy, and to determine for ourselves beauties seen and unseen all around us. The intersections of different art forms themselves are points at which understanding and feeling intensify and achieve clarity.
